Mousejacking

- "MouseJack is a vulnerability that exploits a design flaw in many wireless mice. The flaw uses wireless communication to enable adversaries to anonymously pair another device to your computer from a distance, and then use this secondary device to insert keystrokes or malicious code"
- NOT BLUETOOTH
- Affected devices Amazon, Dell, Gigabyte, HP, Lenovo, Logitech, Microsoft

Linux Mint was Hacked!

- If you downloaded the distro on February 20th, you might have been compromised!
- ▶ At least 30 days worth of forums access

Fin

- ► Anything we missed?
- ► Feel free to share!
